

3" touch screen MP3 player

Wouldn't it be nice to have an MP3 player that listens to you? Samsung's P3 does. You say you want short download times for DIVX movies. And you want to be able to easily put all your favourite utilities right where you want them. Plus have a wide screen that let's you know you've been heard when you touch it. Of course Bluetooth would be nice too. The P3 does it all. And delivers audio quality that you'll definitely want to listen to.

Never miss a note.

Hear your music the way it was meant to be heard. P3's DNSe™ 3.0 technology restores the song's natural highs and lows. And it can create a virtual surrounding to match the genre, from dance club to concert hall. There's even a built-in mono speaker and an FM radio. With the P3, hearing is believing.

The strong not-so-silent type.

Don't let the P3's stylish design fool you. The aluminum casing is rugged and the glass screen is strong enough to resist scratches. Enjoy the wide, 3" high resolution display and the full 16:9 aspect ratio without bars. In silver or black, the P3 can handle whatever you put in it or on it.

Enjoy your freedom.

It multi-tasks like you.

No more wires. Really. The P3 with Bluetooth+EDR lets you take or make calls without taking your cell out. Wirelessly listen to music in your car, on your cell phone, even play games. Transferring photos and music files is faster too. So stay connected without having to be connected.

The P3 is more than meets the ear. Its built-in Flash Player is the ideal way to play flash movies. Or to use some of the great gadgets built right in to mark an important event on your calendar, take a note while on the run, or to set an alarm for that crucial meeting. Aside from all that, you can also just listen to it.

General

Type	Product Type	MP3 Player
Physical	Storage Type	Flash Memory
Physical	Memory Capacity	A (4GB), C (8GB)
