Full HD, 200 AMR, LED-TV

The 37SL833 (94 cm diagonal screen size) combines energy-saving LED-technology and the latest picture processing techniques like Full HD, 200 AMR technology, and Resolution+.

**FULL
HD**
1920x1080

Full HD televisions are capable of displaying the full high-definition resolution level of 1920 x 1080 pixels.

LED TV

In LED televisions, LEDs (Light Emitting Diodes) are used for backlighting purposes. When LEDs are used in televisions, they vastly improve picture quality and lower power consumption.

Resolution+

"Resolution+" technology improves the picture quality produced by conventional image signals by means of a three-stage process that employs edge smoothing and sharpness enhancement techniques. This upgrades the quality of SD pictures to one that is comparable with HD.

DUAL TUNER

Next to an analogue tuner, this TV also offers a tuner for DVB-T and DVB-C.

USB 

With this TV you can enjoy music, videos and images per USB connection.
